LOVOL

LOVOL

P1000

SERIES

LOVOL

NEWLY DESIGNED FOR LEISURE AGRICULTURE

The P1000 tractor is cost-effective, convenient to operate, and comfortable to drive. It can be matched with all kinds of machines and tools, such as front loading, rear excavation, lawn mowers, sweepers, and rotary tillers. It can meet the requirements of lawn maintenance, engineering operations, small farm projects, gardening, greenhouses, and other operations.

COST-EFFECTIVE

- Yanmar 3TNV80F supercharged engine, low vibration, low noise.
- Adopting high-efficiency Donaldson air filter.

COMFORTABLE RIDE

- Newly developed body, using flat floor, vehicle NVH and handling comfort upgraded.
- Adjustable steering wheel, LED lamps for the whole machine, LCD instrument, adjustable armrest seat backrest.

EASY CONTROL

- Optional 3-section HST transmission system, 8F + 8R full synchronizer shift.
- Side-mounted operation, smooth gear shifting.

WIDELY USED

- It is equipped with front PTO, front linkage, Mid PTO functions, optional Industrial tires and Turf tires.
- It can be matched with a variety of machines such as front loading, rear digging, and lawn mowers.

POWERFUL AND EFFICIENT POWER SYSTEM

- ▶ Yanmar engine. It is equipped with a common rail fuel injection system, which brings higher fuel efficiency and reliability.
- ▶ Lead the world. Its accessories are easy to obtain, and it has a perfect market service system.
- ▶ Comply with Euro V emission regulations (with after-treatment). While ensuring excellent performance, achieve good environmental friendliness, low noise, and minimal vibration.

Model	Engine	Number of cylinders	Displacement L	KW(HP) Power KW (HP)	Intake mode	Emission standards
P1025	3TNV80F	3	1.267	18.4(25)	Turbocharged	Stage V

EFFICIENT POWER OPEN A NEW GLORY OF AGRICULTURE

LARGE CAPACITY FUEL TANK

The rear-type large-capacity fuel tank (32 L) can work continuously for up to 8 hours, which can meet the needs of daily home lawn mowing and other operations well.

DONALDSON AIR FILTER

Efficient and reliable. It is designed above the engine in the hood and is easy to maintain.

PLASTIC WIND GUIDE COVER

It is lighter and shaped to fit the hood to achieve complete sealing, and it can completely block warm and cold air.

MORE RELIABLE MECHANICAL SHIFT

SHUTTLE SHIFT

It is arranged on the left side of the steering wheel. It can conveniently carry out reversing operations, reduce work intensity for working conditions requiring frequent reversing such as front-loading operations, and improve productivity.

8+8 SYNCHRONIZER SHIFT

The main gearshift and shuttle gear belong to the synchronizer shift, and the auxiliary gearshift belongs to the sliding sleeve shift. Its shift is smooth, and the driving operation is comfortable; Speed: 1.4 Km/h–23 Km/h.

PTO

Standard wet rear-type two-speed PTO, which can meet the needs of matching a variety of machines and tools;

Optional front-mounted PTO, which can match a variety of front-mounted tools.

4WD

It can easily switch between 2WD and 4WD, and will give you extra traction and pull when the road is slippery.

Its large turning angle makes the operation simple.

EFFICIENT AND CONVENIENT HST VERSION

YANMAR KANZAKI HST DRIVE

Yanmar Kanzaki heavy-duty HST drive: Efficiently converts engine power to that of a usable PTO or drawbar, selecting the best speed for each task and application.

THREE-SPEED GEARBOX

Three-speed gearbox (high/medium/low) combined with double pedal operation makes users work easier, smoother, and safer. High fuel efficiency and wider speed range provide greater towing efficiency.

HST CONTROL SYSTEM

HST cruise control: Keep the tractor at a steady speed and RPM. The driver can set the cruising speed.

Engine and HST speed coupling: Reduced fuel consumption and effective play of interval speed.

Engine speed memory: The engine speed can be automatically restored after steering.

HST DOUBLE PEDAL ELECTRONIC CONTROL

HST double pedal design: Makes it easier for the driver to drive forward, reverse, and control speed.

INDEPENDENT WET PTO >

Front, middle and rear PTO, which can be perfectly matched with all kinds of machines and tools.

COMFORTABLE DRIVING AND SAFE ACCOMPANYING

Yanmar Kanzaki mature heavy-duty HST drive provides power and efficiency.

Three-speed gearbox (high/medium/low) combined with double pedal operation makes users work easier, smoother, and safer. High fuel efficiency and wider speed range provide greater towing efficiency.

LOVOL

ADJUSTABLE STEERING WHEEL

The steering is adjustable to the operator's needs.

PURE FLAT FLOOR

Pure flat floor design that allows operators to get in and out easily and safely, and provides ample legroom during operation.

COLOR-CODED OPERATING LEVER

Color-coded lever makes the operation more handy.

MULTIPLE INTERFACES

Type-C interface + USB + cigarette lighter, seven-hole socket for rear output appliances + European standard interface, fully charge your mobile phone while working.

FOLDING SAFETY FRAME

Folding safety frame that meets EU certification to protect your driving.

LUXURY SUSPENDED SEATS

Grammer mechanical suspended seats, which are ergonomically designed, provide adjustable armrests and seat back.

BACKLIT SILICONE PANEL

The advanced backlit silicone panel not only has comfortable keys, good waterproof and moisture resistance, and strong aging resistance, but also provides great convenience for operation at night.

LED DAYTIME RUNNING LAMP

The unique shape of daytime running lamp provides better safety for your daytime driving.

> FULL BODY CAST STEEL

Vehicle of Steel. The heavy-duty structural components of the whole vehicle are made of steel castings, which are strong and durable.

> 2-WAY HYDRAULIC OUTPUT

With standard 2-way hydraulic output, you can freely choose a variety of applications throughout the year. Make this tractor a highly flexible and all-weather machine.

> LAUKA QUICK-CHANGE JOINT

Select Lauka quick-change joints with smooth connections and strong reliability. Towing + towing can be optionally equipped at the same time.

> OPTIONAL NARROW TRACK AND REGULAR TRACK MODELS

The narrow track model has a minimum body of 1.2 m, which is your right-hand helper when shuttling through narrow environments.

The regular track model has a wider body, providing a smoother operating experience, and at the same time, it has a 55° steering angle, making steering more flexible.

1000mm

1220mm

*Based on data measured under standard tires

> LED LIGHTS

The full vehicle is equipped with LED lights with high brightness and strong penetration, making the operation safer, especially in the case of low visibility, such as rainy days or dusty working environments.

> HYDRAULIC SYSTEM

Powerful hydraulic system that enables easy lifting of all machines and tools. The tractor is equipped with a 3-point rear category 1 lifter with a lifting capacity of 700 kg.

> LCD INSTRUMENT

Compared with ordinary instruments, the information display of LCD instruments is intuitive. The background is beautiful and the degree of intelligence is high. Better waterproof performance and high reliability.

> SHIMADZU GEAR PUMP

Rugged and durable Shimadzu gear pumps with high efficiency. With large flow, low noise, high reliability, it provides 17L/min output flow.

OPTIONAL

> MID-MOUNTED LAWN MOWER

- The transportation lifting height is high, which can reach 150 mm, with strong passability. The mowing height is 25 mm–100 mm, and it can be adjusted to five levels.
- The mowing hitch is automatic, which is convenient for users to install. Standard 60-inch lawn mower with professional grass removal mechanism, suitable for humid climate in Europe.

> FRONT SUSPENSION PTO

- Optional front linkage and front PTO
- Quick hitch as standard
- The front PTO is an engine direct connection structure with high transmission efficiency
- Lifting force 780 kg (ball pin)

> MULTIPLE TIRES TO CHOOSE FROM, MEETING THE NEEDS OF VARIOUS WORKING CONDITIONS

**AGRICULTURAL TIRE
BIAS TIRE**

Front wheel:7-16 Rear wheel:11.2-24

**AGRICULTURAL TIRE
RADIAL TIRE**

Front wheel:240/70R16 Rear wheel:320/70R24

INDUSTRY TIRE

Front wheel:28*9-15 Rear wheel:15-19.5

TURF TIRE

Front wheel:26*7.5-12 Rear wheel:10.5/80-18
Front wheel:23*8.5-12 Rear wheel:33*12.5-15

> LOVOL'S SELF-DEVELOPED FRONT LOADING

- Mechanical self-leveling function, which improves shoveling and discharging efficiency.
- The main structural parts are steel castings with strong bearing capacity.
- Optimize the position of the control mechanism and reduce the driver's long-term working load.
- The bucket interface meets European standards, and users can choose it themselves.
- The installation of the front loading and the bucket are quick-change mechanisms, which are convenient for users to change by themselves.
